Name: Deep Joshi

+91 92656 41668 | 24bce152@nirmauni.ac.in | github.com/deeplumiere

Working in Computer Vision training at Nirma University. Multimodal evaluations and collaborations with the EvalEval Coalition. Interested in Computer Vision, Robotics, and willing to explore!.

EDUCATION

B.Tech, Computer Science & Engineering — *Nirma University, Ahmedabad*

07/28 - 05/28 (Expected) | CGPA: 8.5/10

- Coursework: Computer Networks, Machine Learning, Computer Vision, Design and Analysis of Algorithm
- 2× NASA SpaceApps Global Nominee · IEEE Tech Explorers Challenge Finalist · Kaggle Dataset Expert · Studying MIT16.485 - Visual Navigation for Autonomous Vehicles

SKILLS

- **Languages: Python**, C#, JavaScript, PHP
- **ML / CV:** PyTorch, OpenCV, MediaPipe, WandB
- **Backend & Data:** Django, PostgreSQL, Apache Parquet
- **Tools:** Linux (Fedora), Angular, GitHub Certified

EXPERIENCE

Student Member — *EvalEval Coalition (Global)*

Jun 2026 - Present

- Working on multimodal evaluation extensions in vision and action tasks for EveryEvalEver project.
- Involved in collaborations and outreach for the organisation with various institutes, like UK AI Security Institute blog here, FutureSearch, and more.

PROJECTS & RESEARCH

FoViT — Recurrent Foveated Vision Model — *CVPR 2027*

Nov 2025 - Present

- Designed and trained a 6.8M-parameter recurrent foveated vision model from scratch, reaching 79.6% top-1 accuracy on ImageNet-1K and 72.6% on VTAB — entirely on a single 8GB-VRAM GPU, reaching SOTA in 5-10M params range
- Contributed to architecture, training and evaluation of the model across 5 benchmarks and inference costs being a lead author.

DeepSkills — Agentic Pipeline — deeplumiere.github.io/DeepSkills

May 2026 - Present

- Built a content-extraction and reformatting pipeline processing 100+ pages per run, with automatic Mermaid diagram generation and LaTeX integration
- Shipped as reusable Model Skills for Antigravity and GitHub Pages
